Critical Infrastructure Protection (CIP)

The United States Fire Administration (USFA) has created an information sharing and analysis center with a mission to collect, analyze, and disseminate information about the protection of critical infrastructures as well as encourage those in the emergency services sector to practice protection techniques.

The Emergency Management and Response-Information Sharing and Analysis Center (EMR-ISAC) offers no-cost consultation services to emergency services entities. To assist with this mission, they have published a Process Job Aid and Homeland Security Advisory System Guide and they are posted on the USFA website. In addition, there are quick and user-friendly portals on the DisasterHelp.gov website.

To subscribe and participate in the CIP program go to <http://disasterhelp.gov/usfacip.html> or call 800-451-2647.
